Abstract

Traditional Chinese medicines and herbal medicines in particular have been used in the treatment of cancer for thousands of years in China, Japan, and other Asian countries and have recently……

Keywords: Chinese herbal medicine, adjuvant treatment, chemotherapy, radiotherapy
1. Introduction

Cancer has emerged as a major global public health problem (1). Its incidence and mortality rates continue to rise. A report released by the World Health Organization (WHO) shows that in 2008 an estimated 12.7 million people were diagnosed with cancer and 7.6 million people died from cancer ……

Over the past few years, use of complementary and alternative medicine (CAM) has become increasingly popular among cancer patients in Western countries with a prevalence as high as 80% (5,6).Traditional Chinese medicine (TCM) ……

Therefore, an understanding of Chinese herbal medicines is needed by physicians and other health care providers. This review provides evidence for use of……

2. Chinese herbal medicines commonly used as adjuvant treatment in cancer therapy

Chinese herbal medicines have been used in the treatment of a variety of diseases in China, Japan, South Korea, and other Asian countries for thousands of years (10). The biological ingredients of herbal medicines are mainly ……

2.1. Single herbs

Several single herbs have been found to have a potentially beneficial effect at treating cancer. A brief outline on the oncologic pharmacology of the most commonly used ingredients is presented below (Table 1).

Radix Astragali (*Astragalus propinquus*, huangqi) has been used in China for thousands of years. It is traditionally considered to ……
2.2. Traditional herbal formulations

Traditional herbal formulations (or Kampo in Japanese) are compound formulations that mostly come from Shang Han Lun and Jin Gui Yao Lue, two classics of traditional medicine edited ……
……

3. Clinical trials of Chinese herbal medicines as adjuvant treatment in cancer therapy

In conventional Western medicine, chemotherapy and radiotherapy are major conventional cancer therapies. These therapies are directed at killing or eradicating cancer cells. Unfortunately, distinguishing ……

3.1. Fatigue

Fatigue is regarded as a highly prevalent and unavoidable side effect experienced during the course of cancer and chemo- or radio-treatment. Many studies ……

3.2. Pain

Pain is a common symptom of cancer and the causes of pain can be disease or treatment-related (*e.g.* surgery, chemotherapy, or radiotherapy). The prevalence of pain in patients with cancer has been reported to be between ……
……
4. Conclusion

In conclusion, Chinese herbal medicines substantially influence cancer therapy as adjuvant treatment. In cancer treatment, Chinese herbal medicines in combination with chemo- or radio-therapy are capable of ……
